Docket No.: 69323/P004US/10511468

Application No. 10/087,204 Amendment dated August 25, 2006 After Final Office Action of May 25, 2006

AMENDMENTS TO THE SPECIFICATION

In the specification please amend paragraph [0012] as follows:

database of media files against which media samples are compared to identify the media samples. An exemplary embodiment of the present invention uses an existing system indirectly accessed via an existing company. An exemplary service, http://www.CDDB.com service actually operates in the "background" — people who insert a CD in their PC usually do it through third parties, such as MusicMatch or Winamp. This service (http://www.cddb.com) is also known as Gracenote, which has a large community of users, to harvest fingerprints, i.e., processed metadata. The user interface to Gracenote may occur through a third party, such as MusicMatch. For the sake of simplicity herein, we will leave out the indirect relationship between the user community and Gracenote.
